EDUCATION

- Acropolis Institute of Technology and Research** Indore, India
Bachelor of Technology — Artificial Intelligence and Machine Learning; CGPA: 7.96 August 2024 – August 2028
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
- Vijay Jyoti Academy** Dewas, India
Higher Secondary Education (Class XII) — Score: 85.4% 2024

SKILLS SUMMARY

- Languages:** Python, C, C++, Java
- Frameworks:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
- Tools:** Git, GitHub, Docker, PostgreSQL, Firestore
- Soft Skills:** Adaptive, Writing, Time Management, Multitasking, Quick Learner

PROJECTS

- Books Recommender (Machine Learning, Data Analysis):** Built a python-based book recommendation tool using a Kaggle dataset. Used Pandas and NumPy to clean the data, and used Cosine Similarity to calculate text vectors and match user preferences with the closest book recommendations. (January '26)
- Laptop Recommender System (*visit*) (Machine Learning, Web Deployment):** Created a laptop recommendation application with a Python backend and an interactive Streamlit frontend. Built filtering logic to rank laptops based on user specs and deployed the working application live on Hugging Face Spaces. (February '26)
- Sortify: Sorting Visualizer (*visit*) (Algorithms, Web Development):** Developed a web-based visualizer using vanilla HTML, CSS, and JavaScript to show how classic sorting algorithms (like Bubble, Merge, and Quick Sort) work in real time. Added a custom UI to change sorting speeds and array sizes dynamically for a class project. (May '26)
- Reflect AI: Your AI Companion (*visit*) (Artificial Intelligence, Full-Stack Development):** Vibe-coded a serverless journaling web app using JavaScript frameworks and Firestore for saving user journals. Integrated the Gemini API to build a supportive AI companion for stress relief, alongside writing tools for generating poetry and refining prose text. (June '26)

CERTIFICATIONS

- Python for Data Science — NPTEL — IIT Madras (*visit*):** Scored 83% to finish as a Course Topper (Top 2%). Demonstrated proficiency in core data engineering tasks including advanced dataset manipulation with Pandas, statistical plotting with Matplotlib and Seaborn, and baseline predictive modeling with Scikit-Learn. (April '26)
- Python Foundation Certification — Infosys (*visit*):** Mastered foundational language syntax, control structures, and object-oriented programming (OOP) principles. Applied algorithmic thinking and debugging practices to optimize script performance and handle complex problem-solving scenarios. (January '26)
- Artificial Intelligence Foundation Certification — Infosys (*visit*):** Gained a foundational understanding of machine learning branches, covering regression models, supervised classification workflows, neural network architectures, and industrial applications of natural language processing. (January '26)

VOLUNTEER EXPERIENCE

- IEEE International Conference on Innovate for Humanitarian (ICIH)** Indore, India
Technical Team Member & Visual Designer November 2025
 - Technical Operations:** Managed presentation setups, oversaw technical logistics for international tracks, and streamlined research paper workflows for presenting delegates.
 - Visual Design Identity:** Designed the end-to-end visual assets for the conference, including official backdrops, promotional posters, speaker slide templates, and participant certificates.

EXTRACURRICULAR ACTIVITIES & INTERESTS

- Analytical Strategy:** Engage in strategy-based games to sharpen critical thinking and real-time problem-solving skills.
- Independent Research:** Driven by curiosity to deep-dive into new tech concepts and explore spontaneous research questions.
- Fitness & Discipline:** Practice regular long-distance running to build discipline, consistency, and resilience outside of academics.
